1. Purpose

- This document outlines some rules for the review process for SRS projects

2. Scopes

- All members in SRS Teams

3. Definitions and Abbreviations

- Eng: Engineer
- ASE: Associate Senior Engineer
- SN: Senior
- FRT: Fire Retardant Treatment
- CFS: Cold Form Steel

4. Authority and Responsibility

- The SRS Team is the owner of this procedure. All employees should follow this procedure for ATS projects.

5. Contents

A. PROJECT EVALUATION

1. New Job

Level	Project Evaluation	Description	Note
1	Simple	• Components or demand loads are clearly provided • There are no manual works on the installation details and calculations • There are not much construction issues • No anchor bolt take-off included	
2	Medium	• The project has a lot of construction issues	

		• Projects have plate height changed at each run type • The project uses special material such as: CLT slab, FRT.... • Anchor bolt take-off included • There are manual works on the installation details, or job summary, or material summary but not affect to calculations (no need to provide the extra calculation spreadsheet)	
3	Complex	• Project have manual works on both of details, job summary, material summary, calculations (need the extra calculation spreadsheet) • CFS ATS	

2. New DOP

Level	Project Evaluation	Description	Note
1	Easy	• No change. Just update all files with new plan date • Only adjust the locations of runs which no effect to design	
2	Normal	• Run count and design changed on some runs • There is no manual works or additional works added to the design • Anchor bolt take-off need to be updated	This typically takes about 50% - 60% time of when doing a new project

Eng: Engineer; **ASE:** Associate Engineer, **SE:** Senior; **LD:** Leader

- **Note:** We can send the job without review **in case of a high workload**. However, we need to follow the rules below:
 - Do not send directly to the branch. The job should be sent to ES-US for a full review.
 - Add notification into an email: " [This project is RUSH, and we do not have time to check. Please do the full review before sending it to the branch](#)"

D. MATRIX OF TASK RESPONSIBILITY
